

Supplier Audits

Leading Indicators for a Complete Picture of Supplier Risk

HOW IT WORKS

Lagging indicators are important for measuring success, but measuring *past* incidents only provides part of the picture. To fully manage risk, you need visibility into what suppliers are doing to prevent *future* incidents. Avetta's Supplier Audits provide the insights you need to manage risk and protect your brand.

01

Avetta's qualified and experienced safety professionals work with you to determine goals.

02

Avetta reviews supplier policies, procedures, and training documents. Field observations are also available for site-level visibility.

03

Findings are reported and recommendations for improvement are provided. Suppliers are coached on how to close gaps.

THE BENEFITS

Deeper Visibility

Uncover hidden risk by combining lagging and leading indicators. Guide your company to better decisions with an enhanced picture of supplier risk.

Impartial Evaluations

Preexisting relationships can lead to biased evaluations. Avetta provides objective audits for an accurate view of supplier risk.

Improved Performance

Avetta's assessments are more than simple inspections. If gaps are identified, our qualified and experienced professionals provide guidance for improvement.

Increased Confidence

Forge partnerships with confidence knowing your suppliers have identified, documented, and implemented risk-mitigating measures.

Supplier Audits

THE CAPABILITIES

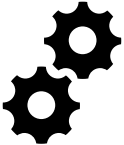

Professional Guidance and Support

Avetta's in-house, experienced safety professionals conduct all audits. They are the perfect guides on your journey to managing risk with leading indicators and helping suppliers close any gaps.

Safety Manual Audits

Avetta conducts thorough review of supplier safety policies and procedures. All findings are presented - including references to where requested items are documented.

Implementation Audits

The evaluation of inspection logs, accident investigation forms, maintenance records, training logs, and more verify proper implementation of policies and procedures.

Field Audits

Avetta's seasoned professionals visit your sites while suppliers are on the job to verify proper execution in the field. Findings and recommendations are reported - including photographic evidence.

Sustainability Audits

Comprehensive review of suppliers' ability to implement industry sustainability standards. Protect your brand by ensuring your suppliers are held to your economic, environmental, and social standards.

Avetta really simplifies subcontractor management. Even in the field, we can review all subcontractor information, including their safety manual. Avetta allows us to determine compliance status at a glance.
