

Employee-Level Qualification and Training For Greater ROI from Outsourced Workers

EmployeeGUARD empowers organizations to take control of their contractor qualification and training process down to the individual employee level. Get the best quality of work and a greater return on investment by ensuring only the right people with the right training and qualifications are allowed to perform critical job functions.

Reduced Risk

Reduce contractor risk by taking control of the employee qualification process. Verify contractor reported qualification and ensure that only the right workers are allowed to perform work.

Increased Safety

Gain the visibility needed to identify, monitor, and address license and certification gaps. Know exactly who is coming on site and ensure that they are properly trained to safely perform critical job functions.

Faster Induction

Get contracted employees ready to work at your site faster by clearly communicating requirements for each job and requiring employees to complete site-specific training before they arrive to your site.

Enhanced Quality of Work

Get the best work quality out of your outsourcing investment and avoid costly delays by ensuring contracted employees have the right qualifications and are properly trained.

FEATURES

Learning Management System

Save time by hosting custom and ready-to-run induction and orientation content online and ensuring proper knowledge retention through assessments before contracted employees arrive on site.

Easy Access

Employees can easily access site requirements, training materials, and receive notifications anytime from anywhere via web-enabled devices, with one login credential, across multiple sites.

Connected Platform

Seamlessly connect your entire organization and suppliers for better decision making about who you give access to at your sites, providing a safer and more secure work environment.

Qualification Document Upload

Ensure that employees have the necessary documentation required to perform work at your site, from appropriate licenses and certifications to site-specific training.

Multi-Language Support

Companies with a global reach can easily localize the experience for international users with our multi-lingual platform to provide a seamless global experience.

Dashboards and Reporting

Get full visibility into managing contracted worker compliance with qualification and historical training status. Intuitive reporting provides quick and easy access to both high-level insights and detailed reports.

GlobalCo Energy US - East (member)

The screenshot shows the Avetta EmployeeGUARD web interface. At the top, there's a navigation bar with the Avetta logo and a user profile for John Alexander. Below that, there's a 'To Do List' section with a table of tasks. The main area contains several data tables and reports, including a 'User Assignments' table and a 'Connection Summary' table. The interface is clean and professional, with a blue and white color scheme.
