

From: Robbin Shouse, Avantor Performance Materials
Subject: Avantor Performance Materials and Avetta: Our New Contractor Management System

At Avantor Performance Materials, we are implementing a new Contractor Management System with our partners at [Avetta](#). We serve industries subject to rigorous quality, performance, and reliability regulations; we require all contractors we work with to meet these same compliance standards. Our partnership with Avetta will ensure we are fully compliant with OSHA standards and regulatory requirements in every region we operate.

Using Avetta's software, we can put our entire supply chain on a single platform to help manage health and safety, sustainability, and risk. With this new program and partnership in place, we want to make it easy for you to understand our work requirements, become compliant, and remain compliant for future work with us.

Our Contractor Management System with Avetta

We are asking you to register in the Avetta network and complete our vetting process to achieve compliance. With an Avetta membership, you become searchable to a global network of 500+ hiring clients, fast-track work readiness through 1-on-1 pre-qualification support, strengthen client relationships, and protect your business from risk.

There is a cost to join the program based on the level of compliance required for your business and the type of services your company offers.

What's next?

Please keep an eye out for an invitation from the Avetta Registrations Team (on behalf of us at Avantor Performance Materials). Avetta's Team will reach out to walk you through registering with Avetta and joining our Contractor Management System.

Please reach out to contractormgt@avantorsciences.com if you have specific questions about your working relationship with us. We're looking forward to our continued partnership!

Thank you,
