

Since 1989, Lee Contracting has put our expertise to work on projects across aerospace, automotive, energy, environmental, and heavy industry. Our track record is built on one thing above all: getting our people, and everyone on our jobsites, home safe.

That's why we've partnered with Avetta. As our subcontractor network has grown, so has the need for a single, reliable way to track safety qualifications — no more scattered paperwork or manual follow-up. Avetta gives us and our subcontractors one place to manage that information, so you can spend less time on compliance admin and more time on the work.

If you're part of our supply chain, this is the new standard for staying qualified on Lee projects. Join the network below to get started.
