

# Business and cyber risk

Unified financial stability, global sanctions, and cybersecurity monitoring

With 81% of organizations facing disruptions and nearly half of breaches stemming from third parties, relying on static vetting is not enough. Blind spots in supplier financial and cybersecurity health can lead to operational failures, data theft, and reputational damage that manual processes cannot catch in time.

Avetta's Business & Cyber Risk delivers comprehensive, real-time visibility into the stability and security of your suppliers. It combines predictive financial scoring and global sanctions monitoring with cyber health ratings powered by SecurityScorecard. This unified view helps you identify warning signs early, prevent costly data breaches, and ensure your partners are financially and operationally resilient.

## Benefits

- 1 Safeguard business continuity**  
Prevent operational delays by monitoring supplier financial stability in real time. Avetta delivers predictive insights that identify insolvency risks months in advance, allowing you to proactively manage exposure and maintain a resilient supply base.
- 2 Strengthen cyber resilience**  
Protect your organization from data theft and service outages caused by third-party vulnerabilities. Avetta provides instant cyber health ratings for your entire supply chain, giving you the visibility needed to identify high-risk suppliers and enforce stronger digital security protocols.
- 3 Mitigate regulatory and reputational risk**  
Prevent costly mid-project supplier replacements and contract renegotiations caused by compliance failures. Avetta's automated vetting process helps protect your brand credibility and avoid severe legal penalties associated with restricted or non-compliant partners.

**28%**

Fewer business disruptions achieved through early risk screening

**25%**

Lower compliance risk exposure

**70%**

Effectiveness in predicting financial risk a year in advance

## Features

### Predictive financial scoring

Evaluate supplier stability with a proprietary risk score that predicts insolvency up to 12 months in advance. Avetta analyzes payment behavior, legal filings, and historical data to give you the foresight needed to secure your supply chain before a default occurs.

### Global sanctions & media monitoring

Continuously screen partners against over 200 global sanctions lists and 35,000 adverse media sources. This automated vigilance detects legal violations and ethical misconduct instantly, protecting your organization from regulatory fines and reputational damage.

### Instant cyber health ratings

View real-time cybersecurity scores for your entire supply base without any supplier action required. Powered by SecurityScorecard, this feature identifies digital vulnerabilities and data breach risks immediately so you can prioritize your remediation efforts.

### Cyber risk assessments

Go beyond the risk score with qualitative questionnaires that verify internal data policies and IT practices. These assessments provide a deeper layer of due diligence to ensure that suppliers handle sensitive information in accordance with your specific security standards.

## Gain total risk visibility into your supply chain.

Protect your operations from financial instability and cyber threats with a single, unified solution.
