BREAKOUT SESSION

# Connecting Platforms and Data to Increase Productivity

# Meet Your Presenters

**Hana Chadburn**

Specialist – Systems

**Tim Workman**

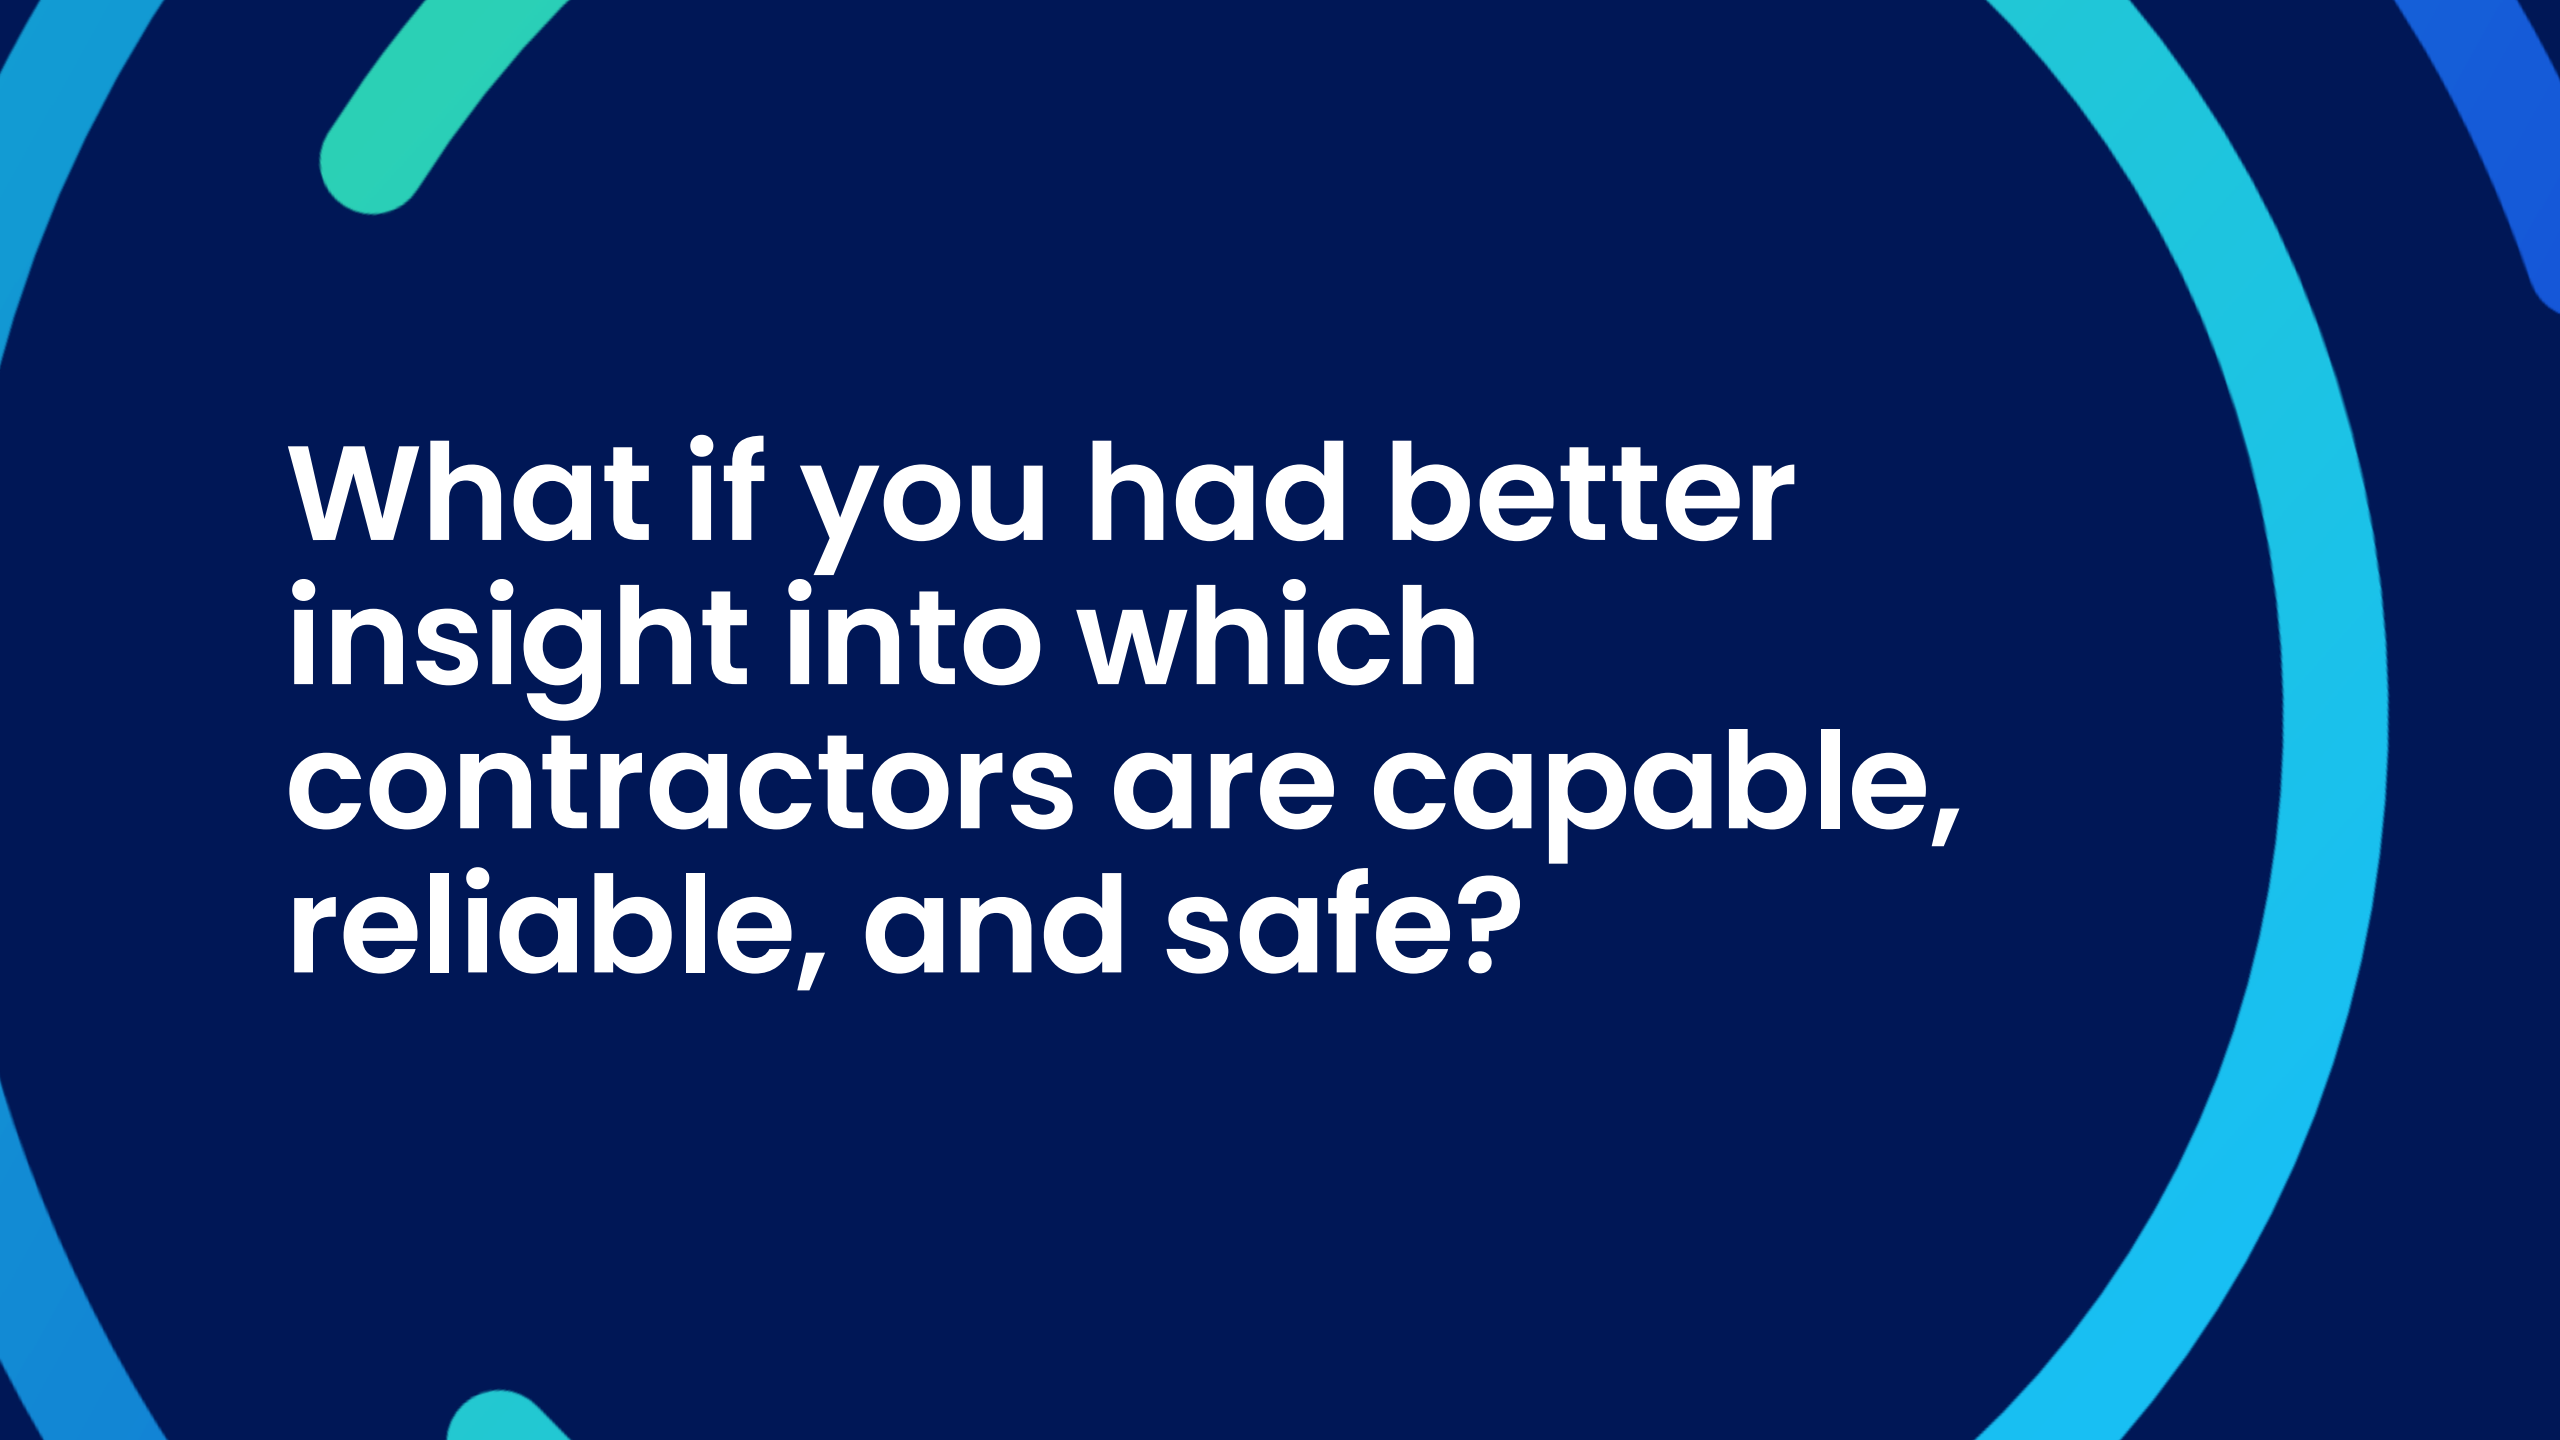

Account Executive

**Shah Haque**

Manager, Software Engineering

**What if you had better  
insight into which  
contractors are capable,  
reliable, and safe?**

**With Avetta APIs,  
everything you  
need is at your  
fingertips — in  
the tools you  
already use.**

# The Case for API Integration

**Share data  
between systems**

**Automated data  
transfers without the  
security concerns**

**Timely updates of  
mission critical  
data points**

**Customise  
workflows and data  
processing**

**Greater  
interoperability**

**Check and validate  
data between and  
across all your  
systems**

# How Avetta Connects

**Secure API Key  
Authentication**

**2-Way, on demand  
Data Updates**

**REST API Standard  
Protocol Architecture**

**API documentation, sandbox  
environment and tech help**

# Common Use Cases

Use Cases	Description
<b>Vendor Onboarding</b>	Connect new suppliers straight from your procurement system without manual processes and hand-offs.
<b>Data Validation</b>	Compare supplier data from Avetta with other key systems to provide accuracy and consistency.
<b>Business Analytics</b>	Combine the data in Avetta with data from other systems to gain real insights into your supply chain and workforce.
<b>Procurement</b>	Sync supplier compliance statuses to internal systems to help manage purchasing decision making processes.
<b>Worker Competence</b>	Sync worker records with learning management systems to track learning and development goals.
<b>Site Access</b>	Send worker compliance status to time/attendance or access control systems to prevent unqualified workers from entering job sites.

# Real Clients. Real Results.

How Whitehaven Are Solving Key Pain Points  
with Avetta APIs

# Whitehaven: on a mission to support and sustain communities through providing energy security

## Challenge:

Use supply chain data collected by Avetta to better inform decision making processes

## Solution:

Integrate key business and operational systems to make better use of complex datasets

## Impact:

Streamlined operations, reduced duplication and centralised data for reporting and decision making

# Confidence BEYOND Compliance

## Problem 1

Teams struggle to align their internal systems to records in Avetta, leading to duplicate entries and fragmented data. This slows down registration and delays onboarding.

# Employee Onboarding

Sync HRIS systems with Avetta to provide for automated, timely, accurate, duplicate-free worker record creation.

## Tools

The Dayforce logo is displayed in a blue, lowercase, sans-serif font.

Pegasus  
Workforce

## Data types

- Worker details
- Company association
- Site association
- Worker termination

# **Confidence** BEYOND **Compliance**

## **Problem 2**

Key safety and compliance data lives in silos, making it difficult for decision-makers to see trends, track performance, or justify investment.

# Business Intelligence

Blend Avetta data into BI dashboards for powerful analytics.

## Tools

Power BI

Pegasus  
Workforce

## Data Types

- Contracting company data
- Compliance data
- Worker data
- Competency and roles data
- Exposure hours data

# **Confidence** BEYOND **Compliance**

## **Problem 3**

Production scheduling teams do not always know who is on site and what qualifications they have to efficiently allocate crew members to equipment for shift operations.

# Operational Foresight

Inform operation systems of worker attendance and qualifications.

## Tools

**CoalTrak**

Pegasus  
Workforce

## Data Types

- Worker log-in times
- Worker roster validation
- Worker competencies
- NOK for emergency response

# Expert Help for Seamless API Integration

# Avetta API Team

Our experienced integration experts are here to help!

Gather business needs and identify integrations that would advance your initiatives.

Understand your existing third-party systems.

Design an integration workflow that would work best between Avetta and your internal systems.

Support your IT organisations in testing the integrations.

Deploy the integrations live to automate manual processes.
