

Safety Maturity Index

Enabling Continuous Improvement
of Supplier Safety Maturity

Conventional prequalification and compliance processes are not designed to enable improvement, leaving supplier prequalification or performance failures unexplained.

Avetta's Safety Maturity Index provides a granular and evolving view of contractor safety capabilities. Identify their strengths, weaknesses, and improve performance with tools for collaborative and continuous safety improvement.

Benefits

1 Continuous Improvement

Set the foundations for a culture of long-term safety improvement beyond conventional prequalification and compliance. Collaborate with suppliers to assess their safety maturity, strengthen weaknesses, and track progress over time.

2 Granular Supply Chain Visibility

Gain deeper, data-driven insights into your supplier safety maturity landscape with granular reports based on a 5-point evaluation of your suppliers' safety management systems (SMS). Leverage multiple points of comparison for a nuanced view of safety capabilities and detect inconsistencies indicating hidden risks.

3 Enhanced Prequalification & Compliance

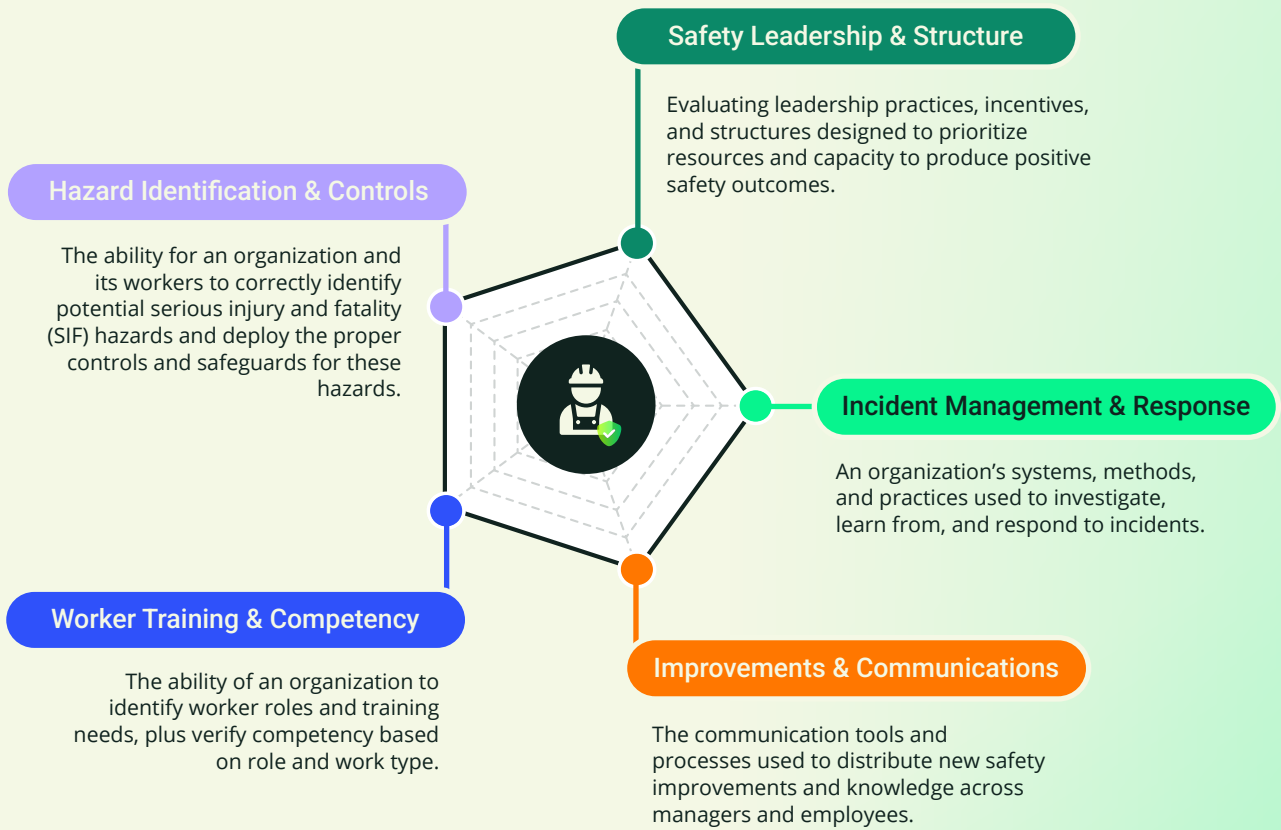

The SMI takes prequalification and compliance beyond static one-time measurements. The evaluation and weighted maturity score provide a holistic, evolving view of safety maturity, enabling accurate performance benchmarking without relying on noisy indicators like culture or regulatory environments.

Features

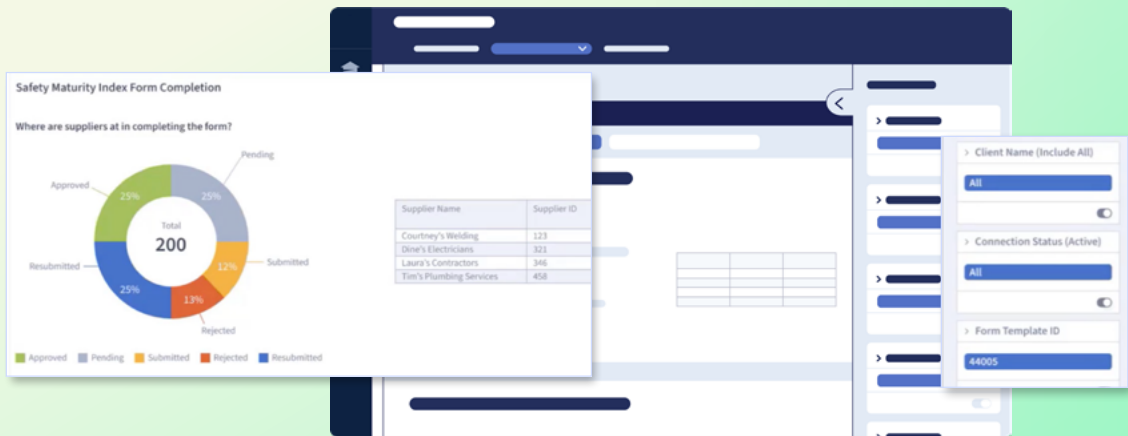

5-Point Safety Maturity Evaluation

With questions based on 15 years of National Safety Council (NSC) research and data from 130,000 global Avetta suppliers, the SMI's 5-point evaluation assesses a supplier's true risk management capabilities, pinpointing the specific SMS elements requiring improvement.

Network-Wide Analytics

Top-level dashboards provide a bird's-eye-view of your supplier ecosystem health. Examine your suppliers' SMI progress, completion rates, maturity grade distribution, average score, and other network-wide metrics.

Features

Individual Supplier Profiles

Drill down into individual profiles for a detailed view of supplier performance. Examine supplier assessment progress, scores per SMI category, responses to questions, and uploaded documentation.

Resources for Improvement

Jumpstart safety improvements based on SMI findings with Avetta and NSC-formulated training materials like the NSC's SIF Prevention Model, recognition toolkits, safety leadership programs, templates, and webinars.

Download our full white paper to learn more about the SMI and how it helps you improve supply chain safety maturity.
