

Safety Maturity Index

Enabling continuous improvement of supplier safety maturity

[Start a conversation](#)

Traditional prequalification and compliance processes provide an important foundation, but they may not reveal gaps in safety processes, controls, or implementation.

Avetta's Safety Maturity Index provides a granular and evolving view of supplier safety maturity. Identify strengths and gaps, then use the findings to support continuous safety improvement.

Benefits

- 1 Continuous improvement**
Set the foundations for a culture of long-term safety improvement beyond conventional prequalification and compliance. Collaborate with suppliers to assess their safety maturity, address weaknesses, and track progress over time.
- 2 Granular supply chain visibility**
Gain deeper, data-driven insights into your supplier safety maturity landscape with granular reports across seven SMI categories. Compare maturity levels across categories for a nuanced view of safety capabilities and identify gaps that may elevate risk.
- 3 Enhanced prequalification & compliance**
The SMI builds on prequalification and compliance with a holistic, evolving view of safety maturity. Results are shown as Safety Maturity Levels overall and by category, helping teams compare supplier capabilities and prioritize improvement.

Features

1

Seven SMI categories

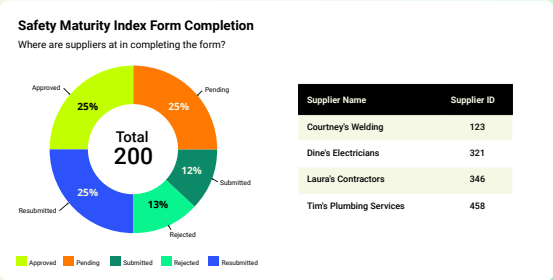

With questions based on 15 years of National Safety Council (NSC) research and data from Avetta's global network of suppliers, the SMI's seven-category evaluation assesses a supplier's safety management system maturity, pinpointing the specific areas requiring improvement.

Features

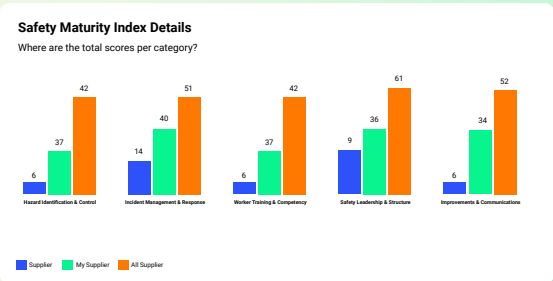

2 Network-wide analytics

Top-level dashboards provide a high-level view of your supplier ecosystem. Examine suppliers' SMI progress, completion rates, maturity-level distribution, and other network-wide metrics.

3 Individual supplier profiles

Drill down into individual profiles for a detailed view of supplier performance. Examine supplier assessment progress, maturity levels per SMI category, responses to questions, and uploaded documentation.

4 Resources for improvement

Jumpstart safety improvements based on SMI findings with Avetta and NSC-formulated training materials like the NSC's SIF Prevention Model, recognition toolkits, safety leadership programs, templates, and webinars.

Get a clearer view of safety maturity.

Assess supplier capabilities, identify areas for improvement, and track safety maturity over time.
