Contractor & Supplier Pre-Qualification Process

Thank you for your interest in exploring a partnership with Industrial Project Innovation, LLC (IPI).

IPI is an owner's representative and project and construction management firm specializing in the planning, management, and execution of complex capital projects across the United States and internationally. We proudly serve clients in the following industries:

- Advanced Manufacturing
- Aerospace & Defense
- Automotive
- Energy Solutions
- Food & Beverage
- Metals & Aluminum
- Mission Critical

To help ensure our projects are supported by qualified, safety-focused contractors and suppliers, IPI utilizes Avetta for contractor and supplier pre-qualification.

All prospective bidders are required to complete IPI's Safety and Commercial Pre-Qualification Questionnaires within the Avetta system. Because pre-qualification must be completed before bid packages can be released, we encourage you to begin the process as early as possible. The questionnaires require a significant amount of information and typically take 1–2 weeks to complete.

Industrial Project Innovation, LLC appreciates the time and effort your company invests in the pre-qualification process.

The information submitted through Avetta is used to evaluate and screen qualified bidders for our projects. Please note that completing the Avetta pre-qualification questionnaires does not guarantee that your company will be included on a project's bid list.

All costs associated with pre-qualification and bidding, including Avetta connection fees, responding to pre-qualification questionnaires, preparing and submitting proposals, attending meetings or interviews, and providing supplemental information, are the responsibility of the potential supplier.

If you have any questions, please don't hesitate to reach out. We appreciate your interest in working with Industrial Project Innovation and look forward to the opportunity to connect.
