

SERVICE MODULES

Induction and Learning Management

CONNECTING A QUALIFIED WORKFORCE

The Workforce Management solution offers an automated online learning solution connected to your roles, sites and projects. We adapt your course material to a practical online format, paired with assessments to test worker comprehension and competency.

Automatic marking and qualification validation linked to worker profiles

WHY ONLINE LEARNING?

- Fast execution
- Large or small numbers
- Any time of the day
- Reach a scattered workforce
- Track message retention
- Automatic marking
- Automatic competency validation
- Free up trainers and resources

COMMON ONLINE LEARNING MODULES

- Generic and safety induction
- Familiarisation
- Toolbox talks
- Theory-based learning
- Process change
- Re-induction
- Featuring interactive multimedia compatibility (PowerPoint, Video, Audio etc) and full assessments with un/structured questions

ONLINE BOOKING

Bookings can be made for workers in the software, or through the worker registration process in your Workforce Management solution. The worker is sent an email link to login to the online learning system and complete the course.

ASSESSMENT

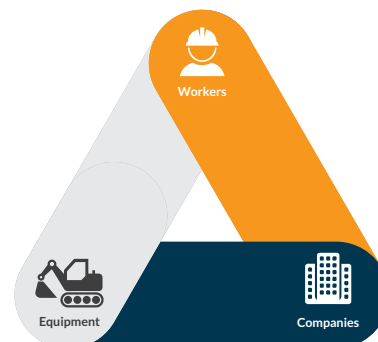

Workers are assessed to demonstrate their knowledge of the course through interactive assessment strategies, with minimum pass marks set. A copy of the assessment is recorded to their profile.

ONGOING COMPLIANCE

The pass result and competency is automatically applied to the worker's profile, with notification sent to both themselves and their company when the induction must be re-taken.

COMPLETE TRAINING

The worker can view rich media productions designed to engage them using video, audio, animation and imagery.
