

Insurance Verification

Proactive Coverage Monitoring
to Mitigate Liability and Risk

Manual insurance tracking leaves organizations exposed to costly liabilities and project delays. When supplier coverage relies on spreadsheets and dispersed emails, critical gaps in policy limits or renewals often go unnoticed, threatening compliance and business continuity.

Avetta's Insurance Verification alleviates this burden by automating the collection, review, and monitoring of Certificates of Insurance (COIs). With expert verification against your specific standards and real-time alerts for expirations, organizations can close coverage gaps, streamline renewals, and ensure every supplier meets the standards to work safely and legally.

Benefits

- 1 Mitigate Risk and Liability Exposure**
Protect your organization from unnecessary financial and operational risk by ensuring suppliers maintain verified insurance coverage at all times. Avetta validates required policy types and limits so you can confidently prevent uninsured or underinsured suppliers from accessing your worksites.
- 2 Streamline Compliance and Reduce Complexity**
Eliminate the administrative heavy lifting of chasing documents and checking expiration dates. By automating certificate collection and renewal alerts, teams can save valuable time and focus on strategic initiatives rather than manual paperwork.
- 3 Gain Real-Time Visibility into Supplier Coverage**
Expose insurance gaps before they become critical issues. With centralized reporting and continuous monitoring, organizations can identify non-compliant suppliers instantly and take necessary actions to align insurance data with global and regional requirements.

Features

Expert Certificate Verification

Collect and validate COIs against your specific business standards. Avetta's specialists review policy limits, endorsements, and verbiage to ensure strict adherence to your requirements.

Automated Renewal Alerts

Proactively manage policy lifecycles with automated email notifications. System-generated alerts warn suppliers and internal teams of upcoming expirations or lapses, ensuring timely updates without manual follow-up.

Broker and Agent Access

Allow brokers to upload and manage insurance details directly within the platform. This collaborative portal ensures data is accurate and reduces the back-and-forth communication burden.

Real-Time Monitoring and Integration

Track cancellations, reductions, or coverage changes as they happen. Push verified insurance documentation directly into your ERP or purchasing systems via secure API to keep your entire tech stack aligned.

Automate your insurance verification today.

Close the gaps in your coverage and protect your bottom line.
