

Prequalification

Faster, Smarter Supplier Prequalification
and Onboarding

Siloed systems and manual processes make supplier vetting slow, inconsistent, and risky. Without reliable visibility, organizations are exposed to unqualified vendors, delayed onboarding, and heightened risk if a supplier fails to meet standards.

Avetta's Prequalification solution streamlines how you collect, validate, and manage supplier data — helping you assess risk faster, cut down administrative work, and improve compliance across your supply chain network. With expert-reviewed assessments and configurable workflows, enjoy consistent, scalable prequalification processes from day one.

Benefits

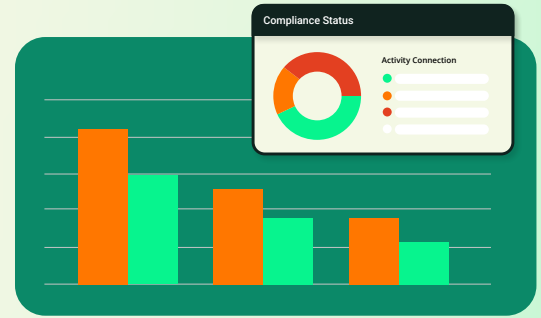

- 1 Operational Efficiency**
Reduce onboarding friction with automated supplier data collection, minimizing document duplication and eliminating time- and labor-intensive manual reviews. Avetta's workflows help teams save time while making the process easier for suppliers to complete.
- 2 Stronger Risk Visibility**
Gain centralized, real-time insight into supplier risk at every level — company, worker, and worksite. With verified data and expert support, you can detect gaps early and act with confidence.
- 3 Smarter Decision-Making**
Leverage accurate, up-to-date prequalification data to guide sourcing, reduce third-party risk, and align with strategic goals. Insights are continuously updated for better planning and ongoing risk management.

Features

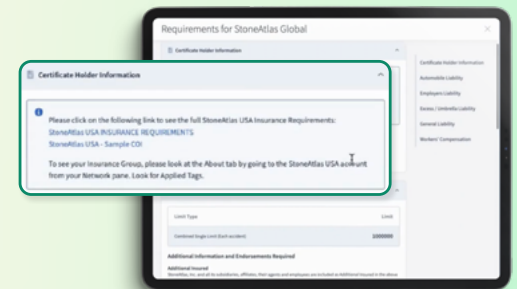

Performance Indicators

Measure supplier safety and compliance with real-time performance indicators.

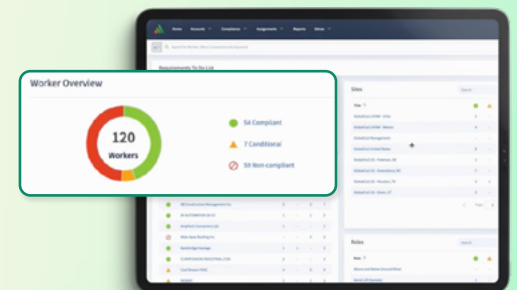

Flexible Assessments & Data Collection

Tailor prequalification workflows to your organization's needs using dynamic forms filtered by trade, role, and risk level. Configure assessments, assign requirements, and streamline supplier inputs with minimal friction.

Subcontractor Management

Extend prequalification to both contractors and subcontractors, applying consistent standards across all tiers for a unified view of third-party risk.

Professional Support

Rely on Avetta's compliance team to verify and continuously update supplier data. Reduce manual effort and ensure consistency with dedicated support across onboarding, audits, and ongoing updates.

Get supplier data you can trust — without the delays.
