

# Safety Audit

Comprehensive Supplier Safety Verification

Relying solely on self-reported documentation creates a dangerous blind spot in your supply chain. When written safety policies don't reflect actual field practices, organizations are exposed to regulatory penalties, operational disruptions, and preventable worksite incidents.

Avetta's Safety Audit solution bridges the gap between policy and practice with impartial, expert-led assessments. Our experts review supplier safety manuals and verify on-site implementation to ensure protocols are actively followed. With clear insights into compliance and safety maturity, you can elevate safety performance and drive continuous improvement.

## Benefits

- 1 Enhanced Safety Performance**  
Improve supplier safety practices with clear, evidence-based insights. Avetta helps close performance gaps and reinforce safer behaviors across your network.
- 2 Verified Regulatory Compliance**  
Protect your organization with confidence by ensuring suppliers meet regulatory and contractual safety requirements, reducing exposure to penalties and preventable incidents.
- 3 Proactive Risk & Maturity Insights**  
Leverage safety maturity insights to anticipate emerging risks and support continuous improvement. Avetta's visibility helps you build a safer, more resilient supply chain.

# Avetta's Three-Tier Safety Verification

## Level 1: Safety Manual Audit

Ensure your suppliers are aligned with your specific safety requirements before they step on site.

- **Reduce Regulatory Exposure:** Verify compliance with relevant local, regional, and national standards to avoid penalties and minimize regulatory risks.
- **Streamline Compliance Efforts:** Reduce time spent on administrative follow-ups to allow clients and suppliers to focus on productivity and fieldwork.
- **Gain Expert Guidance:** Access global health and safety professionals for advisory services, critical analysis, and industry best practices.

## Level 2: Implementation Audit

Verify your suppliers are actively following their documented procedures and training protocols.

- **Conduct Targeted Assessments:** Review confirmation tasks and assess workflows to ensure safety protocols are actively applied to operations.
- **Identify Implementation Gaps:** Pinpoint where real-world execution diverges from documented safety standards to surface high-impact risks.
- **Drive Support and Closure:** Provide expert guidance to resolve findings and verify corrective actions for final audit closure.

## Level 3: Field Audit

Avetta's safety professionals conduct in-person inspections to verify that suppliers are executing your procedures and meeting local regulatory requirements.

- **Execute Targeted Field Observations:** Define the audit scope and perform expert-led on-site inspections to confirm real-time safety behavior and compliance.
- **Deliver Actionable Reporting:** Provide detailed, objective reports that clearly identify non-compliance issues and specific safety gaps.
- **Track Corrective Actions:** Monitor the resolution of identified issues to ensure continuous improvement and close the loop on risk mitigation.

**22%**

Reduction in workplace accidents for companies with safety manuals and training

**2.5%**

Improved likelihood workers follow safety protocols if trained with structure manuals

**25-30%**

Amount of safety training suppliers retain after one week, without reinforcement through safety manuals

“

Our favorite feature in Avetta is how transferable information is between customers. As a supplier, we only have to complete the general audit once a year and this information is available to all customers.”
