

Prequalification: Starting Procurement off on the Right Foot

Why Prequalification?

As a key method of containing risk in supply chain procurement, a reliable vendor prequalification process ensures you work with qualified, safe and socially responsible suppliers and contractors.

A strong cloud-native prequalification platform helps you achieve:

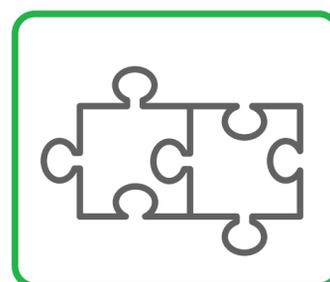

Easy documentation of supplier data

Full visibility of contractor/supplier network

Comprehensive reporting on supplier risk

Total contractor/supplier compliance

Agility and accuracy in procurement

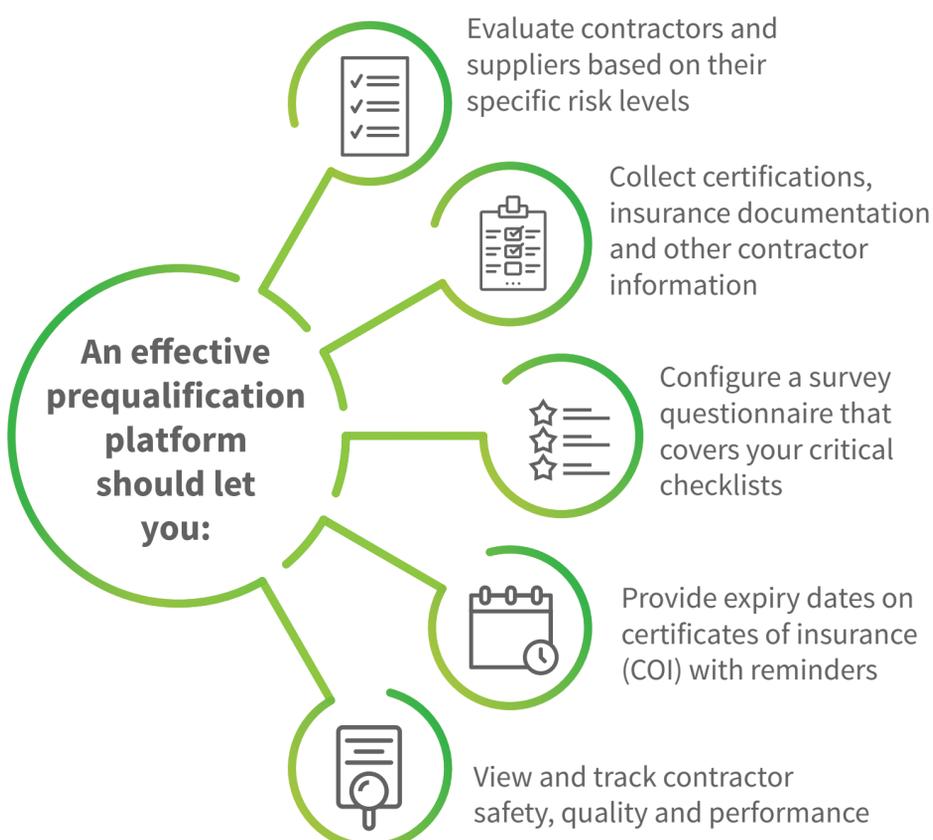

So, what constitutes a robust supplier prequalification platform?

Key features to look for:

Automation for seamless collection and verification of supplier documentation

Platform flexibility and configurability to define specific criteria according to work requirements

A simple dashboard that showcases contractor compliance status in one easy glance

The Avetta assurance
