

Worker Management

Get Real-Time Workforce Insights to Power Safer, More Efficient Operations

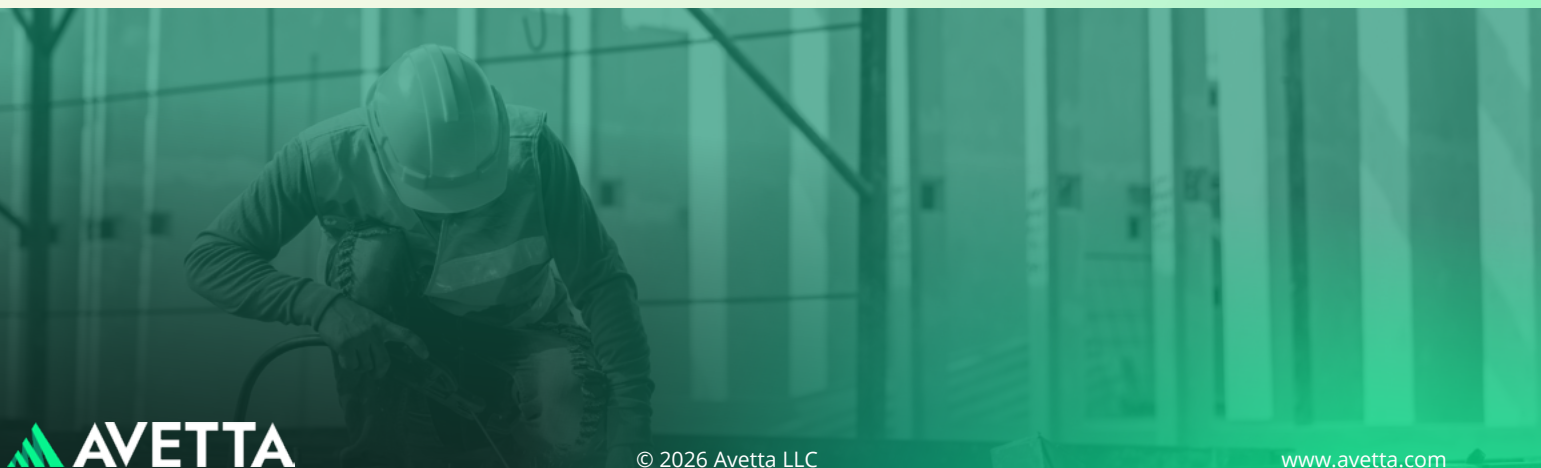

Unqualified workers and manual tracking put worksite safety at risk. Without clear oversight of who's truly worksite-ready, safety lapses can slip through the cracks.

Avetta's Worker Management solution gives you complete visibility into individual worker readiness across roles, contractors, and job sites. From digital training to license tracking and on-site access control, you can ensure only qualified workers are cleared to work on site, reducing delays, noncompliance, and safety risk.

Benefits

- 1 Faster Workforce Readiness**
Accelerate onboarding by delivering role-based training, documentation, and assessments before workers arrive on site. Avetta minimizes idle time and site delays by ensuring workers are cleared and ready to work — helping you keep projects moving and reduce operational friction.
- 2 Verified Worker Compliance**
Reduce operational and safety risk by ensuring every worker has the required, validated certifications and training to perform high-risk tasks. Avetta centralizes compliance data at the individual level, so you can track qualification by role, location, or contract company in real time.
- 3 Controlled Site Access**
Improve site-level safety and compliance by enforcing entry based on verified credentials. With badge scanning and smart access tools, Avetta ensures only qualified, compliant workers enter restricted areas — helping you prevent unauthorized access and mitigate safety incidents.

Features

Online Training and Exams

Deliver role-specific online training and exams tailored to your worksite — enabling workers to complete inductions before arrival. This minimizes idle time and helps keep operations moving without onboarding delays.

License & Compliance Management

Track worker licenses, certifications, and training compliance in real time through an easy-to-use document management system. Customize standards based on role, location, and your company's specific requirements.

On-Site Badge Verification

Issue and scan badges to confirm worker identity, qualification, and site access on any smart device. This ensures only fully compliant personnel enter restricted areas.

Custom Compliance Dashboards

Drill down into worker data by company, role, and location — from individual training history to document status. Create actionable reports to monitor contractor performance and risk.

Ensure every worker on your site is qualified and ready to work.

Start building a safer, stronger supply chain.
