Analytics 2.0

Turn Complex Supply Chain Data into
Clear, Actionable Insights

Fragmented reporting and limited visibility into supplier data make it difficult to manage risk, respond to disruptions, and make confident decisions. With information scattered across systems and teams, critical insights are often delayed or incomplete — slowing sourcing, safety, and sustainability response times.

Avetta's Analytics 2.0 centralizes supplier, worksite, and performance data into one powerful reporting engine. With real-time dashboards, flexible analysis tools, and expert-backed insights, organizations can monitor risk, track compliance, and make faster, data-driven decisions that protect business continuity.

Benefits

1 **Faster, More Confident Decision-Making**

Make better decisions faster with clear, reliable insights into supplier performance, compliance, and emerging risks. Analytics 2.0 gives leaders the visibility they need to act sooner, prevent disruptions, and stay ahead of issues before they affect operations.

2 **Greater Agility Across Your Supply Chain**

Equip teams with the ability to answer questions quickly, adapt to changing conditions, and uncover issues before they escalate. With flexible self-service analytics, organizations can respond faster and stay aligned across safety, procurement, and operations.

3 **Continuous Improvement Through Measurable Insights**

Drive long-term performance gains by identifying gaps, tracking trends, and benchmarking suppliers over time. Analytics 2.0 enables organizations to strengthen compliance, improve safety and sustainability outcomes, and ensure business continuity across operations.

47%
Faster investigations

39%
Fewer communications-related safety failures

3.4%
Higher safety observations reported

Features

Shared Dashboard Library

Access 50+ prebuilt dashboards to monitor compliance, performance, and trends. Filter and drill into data instantly, then share insights across teams to align decisions.

Intuitive, Self-Service Reporting

Edit prebuilt reports and visualizations directly on the platform. Customize filters and views to quickly answer business questions using real-time supplier and workforce data.

Analysis Builder

Create custom dashboards with a simple drag-and-drop interface. Combine data from across Avetta to explore patterns, compare suppliers, and uncover deeper insights.

KPI Alerts & Expert Support

Set real-time alerts to stay ahead of changes in key metrics. When deeper analysis is needed, Avetta's analysts help interpret complex data and surface actionable insights.

Turn complex supplier data into clarity, visibility, and control.

Unlock insights that keep your operations moving.
